

HELIOS

100% recyclable, solar powered messenger bag
and protective sleeves for macbook & ipad

the messenger bag

HELIOS is made of a material called RubbRe,TM

an ecological alternative to leather, which is composed of recycled car tires retrieved from landfills. After fiber and metals have been removed, the tires are ground up into a crumb rubber, which is then compounded with other materials and cured as a non-woven sheet rubber.

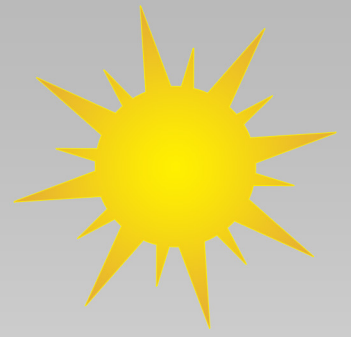

HELIO[©]S is designed for Apple[™] products,
it fits your macbook, ipad, iphone and ipod perfectly. Plus it
has additional compartments for greater space and comfort.

all you need is a little bit of sunshine™

HELIOS is solar powered and energy efficient,

two solar panels generate 12 to 20 watts of power in sunlight. It is water-proof, lightweight and built to withstand abuse. 1 hour in the sun will provide 45 minutes of runtime for your macbook. it is typically sufficient to charge ipad, iphone and ipod. The battery also stores power for later use when no sun is out. It uses standard apple connectors for fast and secure recharge.

choose your color

HELIOS comes in various colors to match your style, it also comes in different sizes to fit 13", 15" and 17" laptops
